PROFESSIONAL SUMMARY

Backend-focused Engineer with a deep specialization in **Java (Spring Boot)** and **PHP (Laravel)**. Proven expertise in architecting financial infrastructure, ledger systems, and high-concurrency e-commerce backends. While my core focus is server-side logic and database optimization, I possess a strong frontend capability, allowing me to build end-to-end solutions and collaborate effectively across the full stack.

TECHNICAL SKILLS

Core Backend:	Java (Spring Boot), PHP (Laravel), Go, SQL (PostgreSQL, MySQL)
Infrastructure:	RESTful APIs, Microservices, Termii API, Paystack API, Docker, Git
Frontend Capability:	JavaScript (ES6+), Vue.js, Tailwind CSS, Responsive Design, AOS
Database Tools:	Schema Design, Query Optimization

BACKEND ENGINEERING EXPERIENCE

FujiCommerce

Lead Backend Engineer

Personal Venture

- Architecting a multi-seller e-commerce infrastructure using **PHP/Laravel** and **PostgreSQL**.
- Developed core ledger systems and merchant verification workflows with a focus on transactional integrity.
- Integrated **Termii API** for automated server-side notifications and **Paystack** for secure disbursements.
- Note: Also handled the frontend architecture using Tailwind CSS to ensure a professional user experience.*

Keep Seats

Backend Developer

Contract/Remote

- Engineered a custom SaaS ticketing engine using pure PHP to ensure sub-second response times.
- Designed a robust MySQL relational schema to handle real-time seat allocation and booking state.
- Built secure API endpoints for OTP verification and transactional email automation.

Ebievik Global Resources

Web Developer

Contract

- Developed a corporate website and implemented technical SEO strategies to maximize organic reach.
- Utilized Framer Motion and lightweight JavaScript libraries to create engaging, animated user experiences.
- Integrated automated email systems for client inquiries using PHPMailer.

KEY TECHNICAL PROJECTS

SpringKit

GitHub

Java, Spring Boot

- Developed a modular toolkit for Java microservices, standardizing API patterns and security configurations.

Bitbet (Full-Stack/Team Lead)

Vue.js, JavaScript, Logic Design

- Led a team to develop a casino-style browser game; engineered complex state management and game logic.
- Leveraged Vue.js to build a dynamic UI while ensuring high-performance DOM manipulation.

Go REST API

Go (Golang), PostgreSQL

- Built a high-performance REST API using Go's concurrency model to handle high-throughput request loads.

EDUCATION & CERTIFICATIONS

Laravel & PHP Mastery

Practical Training

NIIT

Diploma in Full Stack Web Development

Rivers State University

Bachelor of Science in Human Physiology
